

## PROFESSIONAL SERVICES Post Project Review

**At project completion and after a short operational period, the Ellipsiz Project Team will review the initial business requirements against the project outcomes.**

This post project review is important to your business to ensure that your return on investment is maximised.

*High-level illustration of the process used during the Post Implementation Reviews*

Post Project Review will assess the progress of:

- New Business Processes and the Inter-Linking of Old processes (Business User Test Plans).
- Your business Service and Operations Processes.
- Adjustments or new tools requirements.

The Post Project Review will be documented, a Report will be generated, and a proposal if required, will be delivered to your business. It is important to your business that this model is followed and supported to ensure benefits are realised.
